Supplementary file 1: Flowchart

42,509 words were collected from the comments of a total of 1917 participants

Excluded 7,035 comments due to:
1. Irrelevance: for example: “good luck with the study”
2. Too short to be able to interpret their meaning: for example: “side-effects!”

Included in the current study, comments, consisting of 35,474 words in total, from 308 participants
